

### BLEEDING FROM THE THROAT DURING THE? FAST

Q: 2- "I am suffering from a disease in which blood often comes out of my throat. When I fast does this bleeding or vomiting render my fast or wudu invalid?" (Anonymous)

A: No if the blood has come out of your throat and you have not swallowed it again, your fast is still valid. However, your wudu is no longer valid. You will have to perform it again, if you wish to perform prayer after it.

The same ruling applies when one vomits during fasting. One's audit breaks, but does not render his fast invalid.
